

## Posterior Predictive Check

Model-predicted lines should resemble observed data line

## Homogeneity of Variance

Reference line should be flat and horizontal

## Collinearity

High collinearity (VIF) may inflate parameter uncertainty

## Normality of Random Effects (ID)

Dots should be plotted along the line

## Linearity

Reference line should be flat and horizontal

## Influential Observations

Points should be inside the contour lines

## Normality of Residuals

Dots should fall along the line

## Normality of Random Effects (Stimulus)

Dots should be plotted along the line
